

Business Requirement Document: Lead Management System

Project: LMS 2026: CRM Revitalize

Author: Business Analyst

Version: 1.0

Date: July 07, 2026

2. Document Control

Version	Date	Author	Change Description
1.0	07/07/2026	Business Analyst	Initial draft created for stakeholder review.

3. Project Overview

The objective of this project is to build a centralized Lead Management System (LMS) for our sales and marketing teams. Currently, our customer data is scattered across personal spreadsheets and email threads, making it difficult to keep track of new inquiries. This system will act as a single source of truth for all potential customers.

By implementing this tool, we aim to automate how leads are captured, assigned, and followed up. This will ensure that no inquiry is forgotten and that every team member knows exactly what their current tasks are. The focus is on ease of use and improving our day-to-day work efficiency.

4. Business Problem Statement

- **Manual Tracking:** Currently, sales staff use Excel sheets. This leads to data being lost or formatted incorrectly.
- **Duplicate Records:** We often have multiple staff calling the same customer because there is no shared database.
- **Delayed Follow-ups:** There is no system to remind staff to call back customers, leading to missed sales opportunities.
- **Communication Gaps:** When a staff member is on leave, others cannot see the history of conversations with a specific lead.
- **Lack of Visibility:** Management cannot quickly see how many leads are in the pipeline or which sources are performing best.

5. Business Objectives

- Centralize all customer and lead data into one secure platform.
- Standardize the lead capture process from marketing campaigns and website forms.
- Ensure timely follow-ups through automated reminders and task lists.
- Provide clear reports to help managers make informed business decisions.
- Improve team collaboration by sharing notes and interaction history.

6. Project Scope

In Scope

- Lead capture from manual entry and CSV imports.
- Lead assignment and status tracking (New, Contacted, Interested, etc.).
- Activity logging (Notes, Call logs, Emails).
- Automated notifications and reminders.
- Role-based access for different team members.
- Basic reporting dashboard for sales performance.

Out of Scope

- Mobile application (initial phase is Web only).
- Full accounting and invoicing integration.
- Advanced AI lead scoring algorithms.
- Integration with external third-party ERP systems.

7. Project Stakeholders

Role	Business Responsibility
Business Owner	Directs overall strategy and approves the project budget.
Sales Manager	Reviews team performance and manages lead distributions.
Sales Executive	Daily users who update lead statuses and follow up with clients.
Marketing Team	Responsible for bringing in leads and tracking source performance.
Customer Support	Assists with client inquiries and technical troubleshooting.

Business Analyst	Translates business needs into technical requirements.
Development Team	Builds and maintains the CRM software.

8. Current Process (AS-IS)

Leads arrive via email or phone. Staff manually enter details into a shared Excel file on a network drive. Often, files become 'locked' when one person is editing. Reminders are maintained on personal calendars or sticky notes. Managers have to manually ask each staff member for their status to create a weekly report.

9. Proposed Process (TO-BE)

Leads will be entered directly into the CRM. The system will automatically assign leads to the next available executive. Executives will receive an email alert. Every interaction is logged in the system. The dashboard will update in real-time, allowing managers to see progress without calling a meeting.

10. Functional Requirements

This table outlines the specific actions the system must perform to support business activities.

ID	Feature	Description	Priority	Business Value
FR-01	User Login	Secure login for users with email and password.	High	Data security and user accountability.
FR-02	Create New Lead	Form to capture Name, Email, Phone, and Source.	High	Standardized data entry.
FR-03	Edit Lead Details	Ability to update existing lead information.	High	Maintain accurate records.
FR-04	Delete Lead	Restricted deletion of incorrect or test records.	Low	Clean database maintenance.
FR-05	Global Search	Search by name, phone, or email across the system.	High	Quick access to records.
FR-06	Assign Lead to Staff	Manager can manually assign a lead to an executive.	High	Clear ownership of leads.
FR-07	Lead Status Update	Dropdown to select status (New, Contacted, Follow-up, Closed).	High	Track progress in the sales funnel.
FR-08	Activity Notes	Add text notes for every interaction with a lead.	High	Context for future conversations.

FR-09	Follow-up Reminders	System sends an alert when it's time to call a lead.	High	Never miss a scheduled call.
FR-10	Task List Dashboard	A view showing today's tasks and overdue follow-ups.	Medium	Daily work organization.
FR-11	Import Leads (CSV)	Bulk upload leads from an Excel/CSV file.	Medium	Efficiency in migrating data.
FR-12	Export Data	Export specific lead lists to Excel formats.	Medium	Offline analysis and sharing.
FR-13	Lead Source Tracking	Field to identify where lead came from (Web, Referral, etc).	Medium	Marketing ROI analysis.
FR-14	Email Notifications	Automated email when a new lead is assigned.	Medium	Instant communication.
FR-15	Duplicate Check	Alert if a lead with the same email/phone already exists.	High	Prevent data clutter.
FR-16	User Roles Management	Admin can create users and assign roles.	High	System governance.
FR-17	Reporting: Sales Funnel	View total leads in each status category.	Medium	Strategic oversight.
FR-18	Reporting: Team Performance	Report on how many leads each staff member handled.	Medium	Performance evaluation.
FR-19	Audit Logs	Track who changed what and when.	Low	Traceability and compliance.
FR-20	Filter Leads		High	

		Filter views by status, date, or owner.		Efficient data viewing.
FR-21	Lead Re-assignment	Transfer leads from one staff member to another.	Medium	Balance workload.
FR-22	Contact History	Timeline view of all changes and notes for a lead.	High	Complete history overview.
FR-23	Convert Lead to Client	Mark a lead as 'Closed-Won' and lock record details.	Medium	Successful conversion tracking.
FR-24	Dashboard Chart: Lead Sources	Visual pie chart of lead distribution by source.	Low	Visual data trends.
FR-25	File Attachments	Upload documents (e.g. quotes) to a lead record.	Low	Centralized documentation.
FR-26	Bulk Status Update	Select multiple leads and update their status at once.	Low	Save time on bulk edits.
FR-27	Inactive Lead Auto-flag	System flags leads with no activity for 30 days.	Low	Clean up cold leads.
FR-28	Password Reset	Self-service 'Forgot Password' functionality.	Medium	Reduced IT support.
FR-29	Custom Tags	Ability to add labels like 'High Priority' or 'VIP'.	Low	Flexible classification.
FR-30	System Logout	Securely end the user session.	High	Security hygiene.

11. Non-Functional Requirements

These requirements define how the system should operate (quality standards).

ID	Category	Performance Standards / Simple Explanation
NFR-01	Performance	Pages should load in under 2 seconds during normal use.
NFR-02	Security	Data must be encrypted and passwords must not be visible to anyone.
NFR-03	Availability	The system should be accessible 24/7 except for planned maintenance.
NFR-04	Usability	A new user should be able to create a lead with less than 5 minutes of training.
NFR-05	Scalability	System should support up to 50 concurrent users without slowing down.
NFR-06	Backup	The database should be backed up automatically every night.
NFR-07	Reliability	System should have 99% uptime during business hours.

12. User Roles

Role	Responsibilities in the System
Admin	Has full access to manage users, system settings, and all lead data.
Sales Manager	Monitors team performance, reassigns leads, and views all reports.
Sales Executive	Manages assigned leads, updates statuses, and adds activity notes.
Marketing Executive	Adds new leads from marketing campaigns and tracks their success.
Customer Support	Views lead history to help resolve client questions or issues.

13. User Stories

#	As a...	I want to...	So that...
1	Sales Executive	to see a list of my new leads first	I can call them immediately before they go to competitors.
2	Sales Executive	to set a reminder for a follow-up call	I don't forget to get back to an interested prospect.
3	Sales Executive	to add notes after every call	I remember what the customer asked for last time.
4	Sales Manager	to assign unassigned leads to my team members	the workload is distributed fairly.
5	Sales Manager	to see a report of 'Closed' vs 'Active' leads	I can predict the monthly sales revenue.
6	Sales Manager	to see which leads haven't been touched in 3 days	I can remind the team to follow up.

7	Admin	to deactivate a user account	former employees cannot access our customer data.
8	Admin	to import leads from a CSV file	I don't have to enter them one by one manually.
9	Admin	to reset a user's password	they can get back into the system if they forget it.
10	Marketing Executive	to tag leads with their source (e.g., Facebook)	we know which ads are working.
11	Marketing Executive	to upload a batch of leads from an event	the sales team can start calling them quickly.
12	Sales Executive	to search for a lead by their phone number	I can quickly pull up their record when they call me.
13	Sales Executive	to receive an email alert for a new lead	I don't have to keep checking the system every hour.
14	Customer Support	to view the history of a client's requests	I can give them accurate answers based on their past deals.
15	Sales Manager	to see a dashboard of total leads per source	I can tell the marketing team what's working.
16	Admin	to export lead data to Excel	I can share a quick summary list with the business owner.
17	Sales Executive	to update lead status to 'Closed-Lost'	I can stop spending time on prospects who aren't interested.
18	Sales Manager	to view the activity logs of my team	I can see how many calls were made today.
19	Sales Executive	to mark a lead as 'Urgent'	I prioritize them in my daily task list.

20	Marketing Executive	to see contact details of all new leads	I can send them our monthly newsletter.
----	---------------------	---	---

14. Business Rules

- Unique Email: No two leads can have the same email address to prevent duplicates.
- Team Privacy: Sales Executives can only view and edit leads assigned to them.
- Manager Oversight: Sales Managers have viewing access to all leads across the whole team.
- Deletion: Only Users with the 'Admin' role can permanently delete a lead record.
- Data Completeness: Every lead record must have at least a Name and a Phone number.

15. Assumptions

- All staff have access to a computer and stable internet connection.
- Existing Excel data is reasonably clean for the initial import.
- The project will be completed in 8 to 10 weeks.

16. Constraints

- The system must be accessible through standard web browsers (Chrome/Edge).
- Initial budget for development is fixed.
- Software must comply with local data protection laws.

17. Risks

- Data Migration: Importing old Excel files might have errors or missing info.
- User Adoption: Some staff might prefer their old spreadsheets over the new system.
- Training: Team might need extra time to learn the system during busy sales periods.

18. Acceptance Criteria

- All 30 functional requirements are tested and working without errors.
- Bulk import of 500 leads takes less than 60 seconds.
- All user roles have been verified for correct data access limits.

19. Success Metrics

- 100% of new leads are tracked in the CRM within the first month.
- Average lead follow-up time reduced to under 24 hours.
- Zero duplicate records found after initial cleanup.

20. Conclusion

The implementation of this Lead Management System is a critical step in moving away from fragmented manual tracking. By centralizing data and automating reminders, we provide our sales team with the tools they need to close more deals effectively. Successful delivery of this project will result in higher data integrity and better oversight for management.
