2. Executive Summary

ZenLead AI is an enterprise-grade CRM solution designed to transition the Organization from manual, siloed lead management (Excel, WhatsApp, Email) to an integrated, AI-driven ecosystem. The solution leverages machine learning for predictive lead scoring, streamlines omnichannel communications (Email/WhatsApp), and provides a robust reporting engine to drive revenue growth and operational excellence.

3. Business Problem Statement

The Organization is currently operating a manual lead management lifecycle which lacks transparency and real-time responsiveness. This documentation addresses the following core pain points:

- Lack of a centralized 'Single Source of Truth' for customer data.
- Manual lead assignment resulting in delayed response times (>24 hours).
- High rate of lead duplication and data decay in Excel-based tracking.
- Fragmentation of communication across WhatsApp, Email, and personal devices.
- Absence of predictive analytics to prioritize high-value prospects.

4. Proposed Proposed Solution (TO-BE)

ZenLead AI provides a cloud-native, multi-tenant platform centered around an **AI Decision Engine**. The TO-BE state automates lead ingestion from API-enabled sources, executes machine-learning logic for propensity scoring, and facilitates omnichannel engagement via unified communication silos.

```
[Omnichannel Ingestion] -> [AI Scoring Model] -> [Automated Lead  
Distribution] -> [Actionable Sales Insights]

6. Non-Functional Requirements (NFRs)

Category	Constraint / Requirement
Performance	System shall support 500 concurrent users with 99th percentile latency < 1.5s.
Security	Data at rest must be encrypted with AES-256; Auth via OAuth2/OpenID Connect.
Availability	99.9% Up-time excluding scheduled maintenance windows.
Scalability	Auto-scaling infrastructure to handle 3x peak load during end-of-quarter surges.
Compliance	GDPR and SOC2 Type II compliance for lead data handling.
